MANAGEMENT

Your music. Your disk. Any client. — self-hosted music streaming and collection management

WHERE IT SITS

FEELS

archival warm found

THE IDEA

Your catalogue, found by a signal: the same open ring sweeps a thin copper catalogue line and lands on one item — A's sonar echo disciplined by editorial indexing; two typefaces, paper warmth, one controlled signal.

ONE LOUD THING

One thin copper catalogue rule under the wordmark, repeated as the system's only divider.

WHERE IT DIFFERS

Keeps A's unowned warm-dark + deep-copper territory against the competitors' corporate primaries, and is the only refinement with a true light archival surface — no competitor on the shelf reads as warm paper and copper.

THE MARK

The echo mark set on its catalogue line: open ring and copper dot above a thin full-width copper rule — the sweep crossing the index, landing on one item.

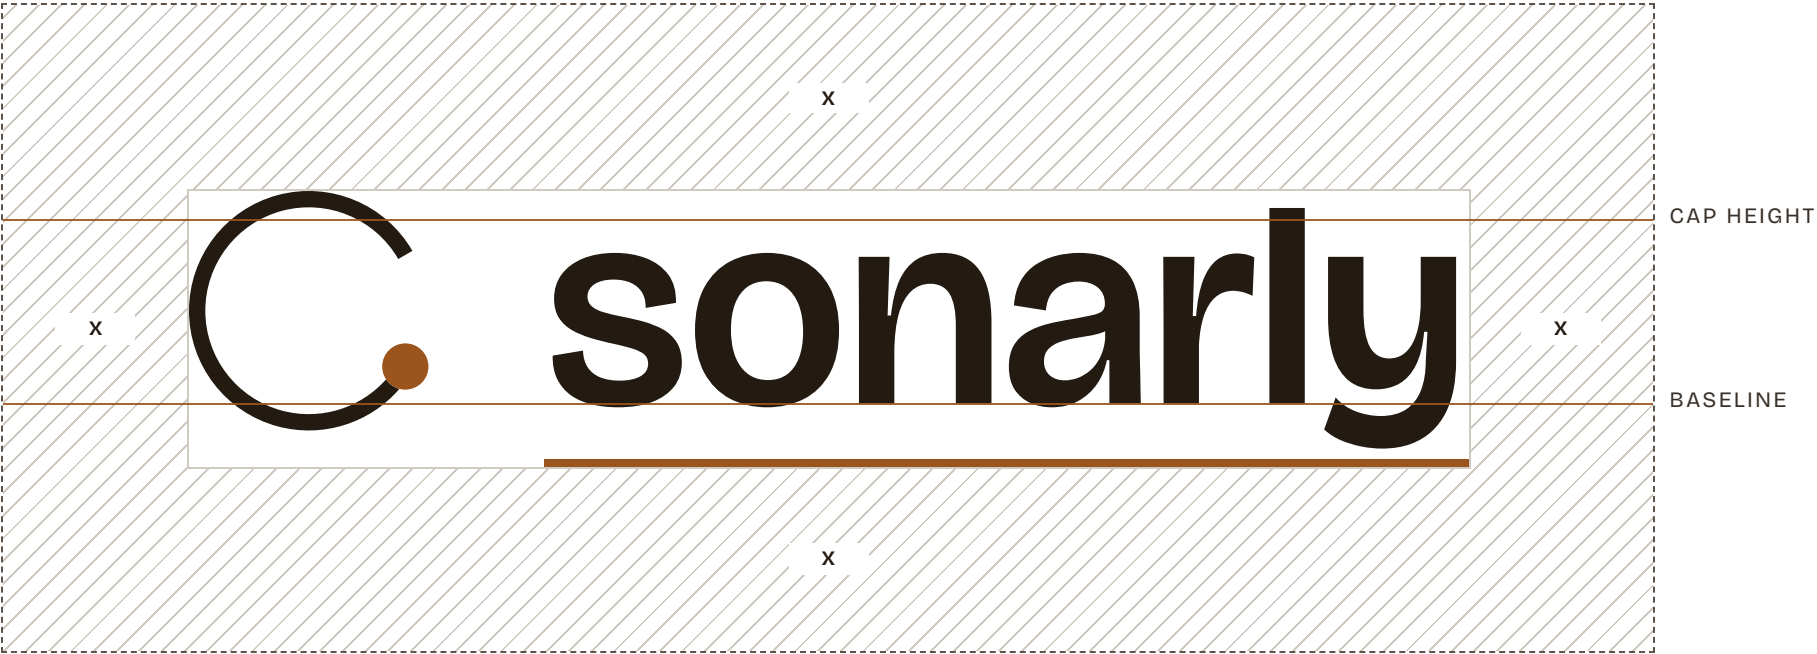

logo

The symbol + wordmark is the primary logo. Use it wherever the space allows; every other version is derived from it.

CLEAR SPACE

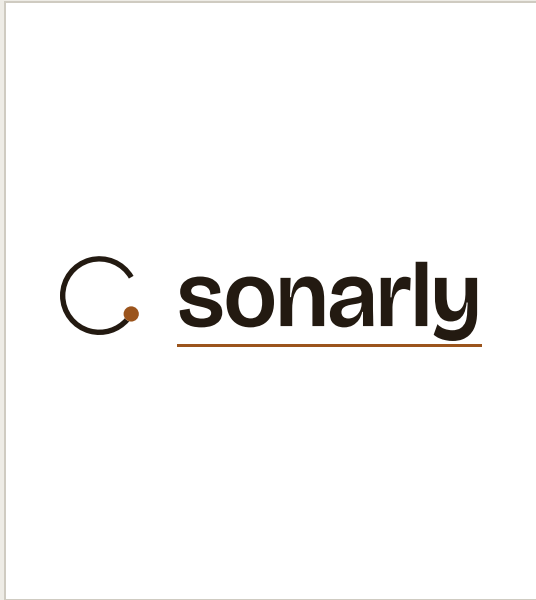

Keep at least $x = 1 \times$ the wordmark's cap height free on every side. (inferred from the drawing; confirm before print)

- Use the supplied files in kit/logo; never retype or redraw the wordmark.
- Scale proportionally, from the corner.
- The guide lines show the cap height and baseline the lockup is aligned on.

logo

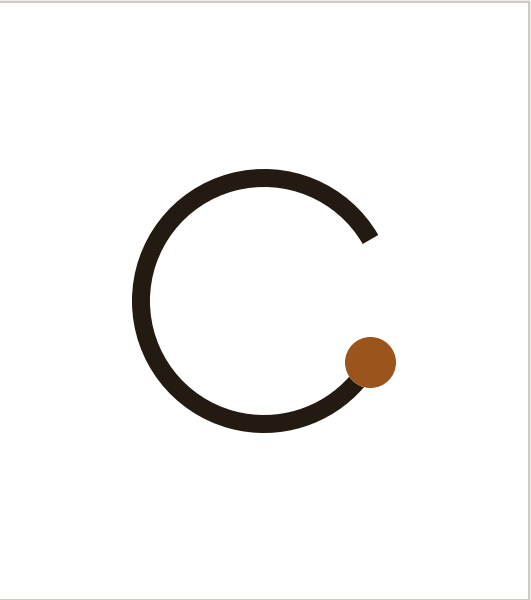

Pick the version by the space, not by taste. When the primary logo would render smaller than 18 px tall, switch to the symbol.

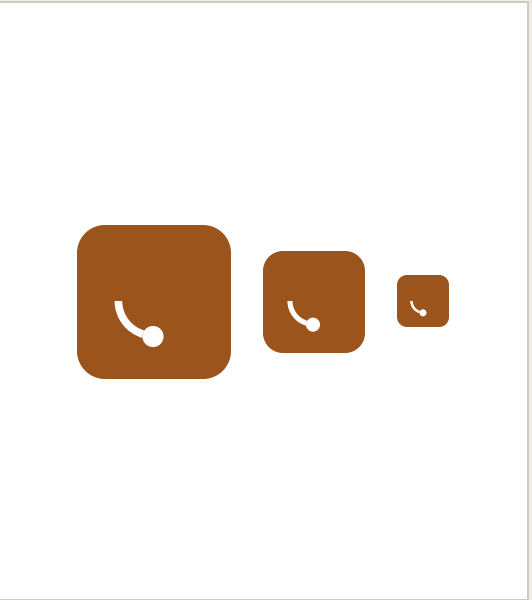

Primary
Horizontal lockup. The default for headers, documents and signage.

Stacked
For square and narrow spaces where the horizontal lockup gets too small.

Symbol
On its own only where the brand is already named nearby: avatars, app icons.

Favicon
The symbol on the primary colour at 48, 32 and 16 px.

 **sonarly**
18 px · smallest on screen

 **sonarly**
6 mm · smallest in print

 **32 px · symbol**

 **16 px · symbol**

Every logo part keeps at least 3:1 against its ground. Where the colours cannot, the logo switches to one colour.

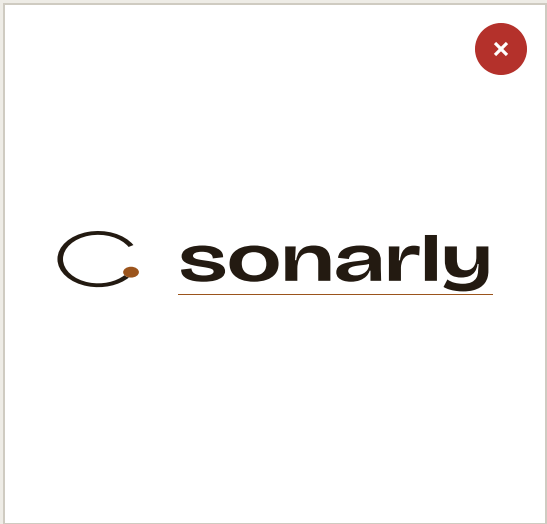

logo

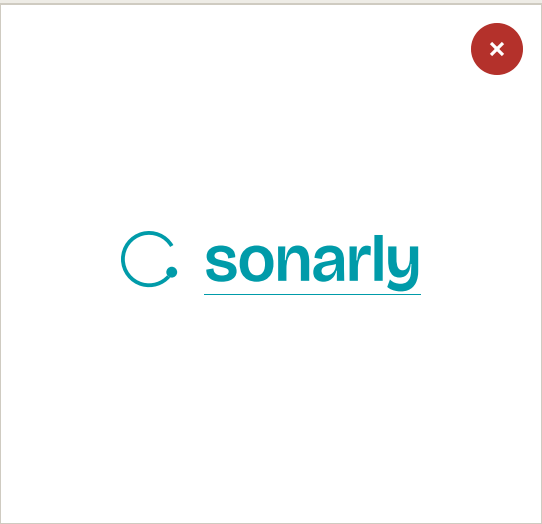

PAPER · FULL COLOUR · 5.7:1

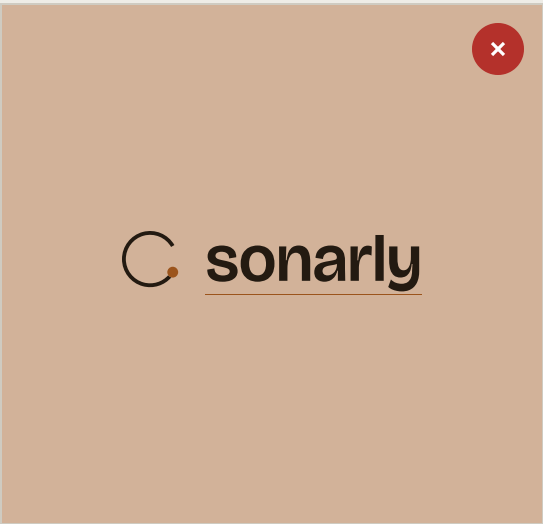

PRIMARY · ONE COLOUR · 5.7:1

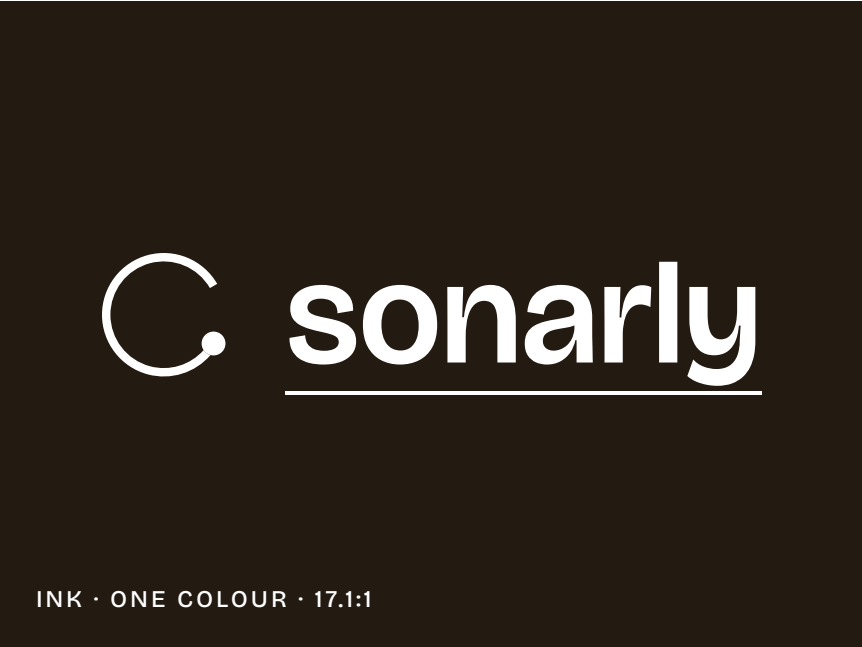

Don't stretch

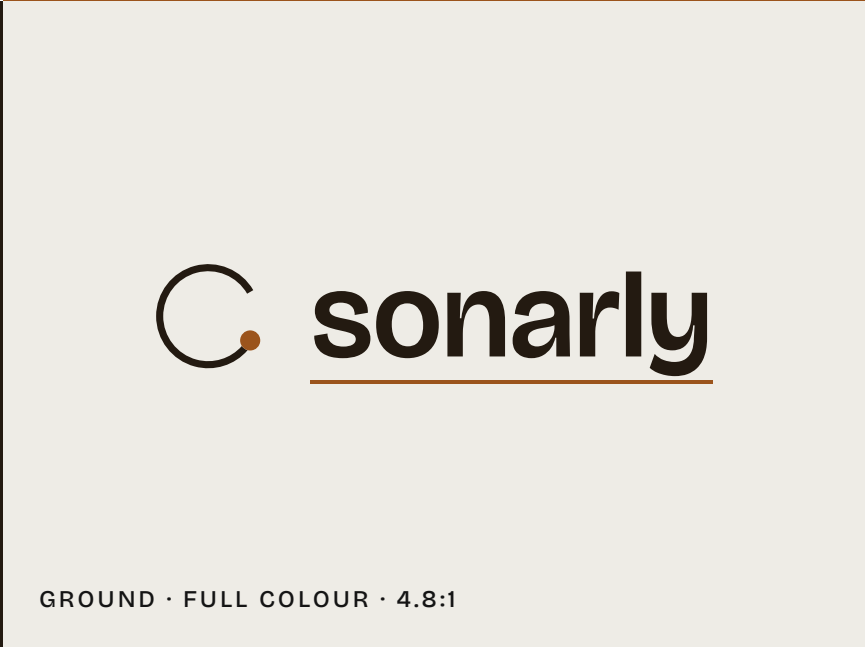

Don't recolour

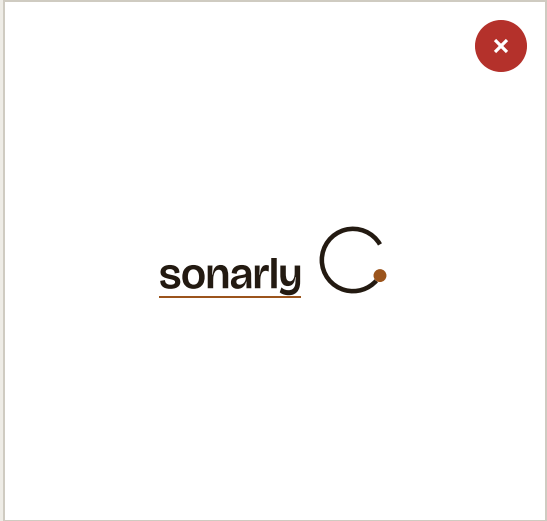

Don't use low contrast

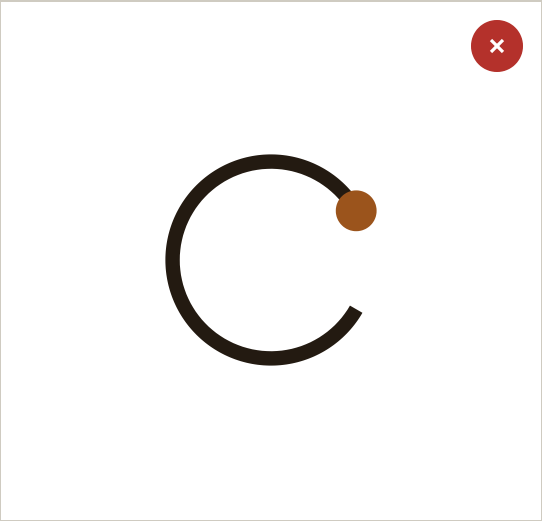

INK · ONE COLOUR · 17.1:1

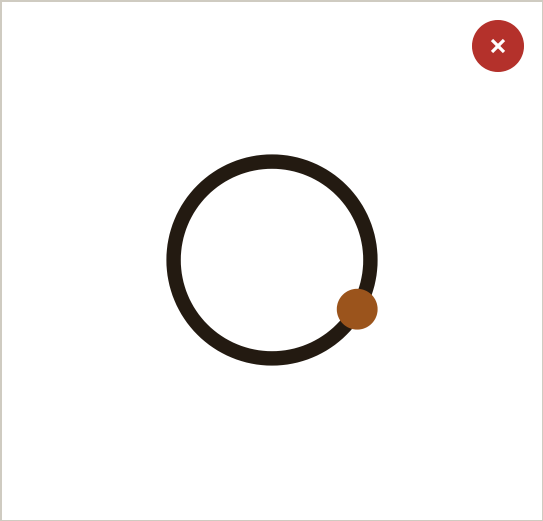

GROUND · FULL COLOUR · 4.8:1

Don't rearrange the symbol and the name

Don't move the echo — the dot returns to the sweep's trailing end

Don't close the gap — a closed ring is a spinner, not a ping

Warm archival paper, near-black ink, one thin copper signal.

colours

Band heights show how much of each colour a typical page uses. Large areas take the ground and primary; the accent stays small.

PRINT

Screen values are exact. For print, ask your printer for CMYK/Pantone matches made with their profile; the Lab D50 values are the reference to match against.

TINTS

80, 50 and 20% for charts and backgrounds only, never for text.

contrast

Body text needs 4.5:1, large text and logo parts 3:1 (WCAG 2.2). Every pair shown here is measured from the palette.

light · Ink on Ground · 14.5:1	light · Muted ink on Ground · 6.3:1	light · On primary on Primary · 5.7:1	light · On accent on Accent · 5.7:1
dark · Ink on Ground · 16.4:1	dark · Muted ink on Ground · 12.2:1	dark · On primary on Primary · 6.7:1	dark · On accent on Accent · 6.7:1

icons

- 24 px grid, 2 px padding, 1.75 px stroke.
- Round caps and joins; no fills except for a selected state.
- Icons take the ink or primary colour, never the accent.
- Sample set shown in the system style; draw new icons to match.

imagery

- Real people, real places; natural light.
- Duotone in the primary and ink for backgrounds behind text.
- The accent appears in pictures only where it already exists in the scene.
- No stock clichés: no handshakes, no glowing orbs.
